Dul's

U.S. Application No. 07/168,190 filed Mar. 15, 1988, (now abandoned) which is a continuation-in-part of U.S. Application No. 07/054,369 filed May 26, 1987 (issued as U.S. Pat. No. 4,943,674); this application is also a continuation-in-part of U.S. Application No. 07/742,834 filed Aug. 8, 1991, now U.S. Pat. No. 5,420,034, which is a continuation-in-part of U.S. Application No. 07/550,804 filed Jul. 9, 1990, now abandoned, which is a continuation-in-part of U.S. Application No. 07/147,781 filed Jan. 25, 1988 (abandoned) which is a continuation-in-part of U.S. Application No. 07/078,538 filed Jul. 28, 1987 (abandoned) which is a continuation-in-part of U.S. Application No. 07/078,538 filed Jul. 28, 1987 (abandoned) which is a continuation-in-part of U.S. Application No. 06/891,529 filed Jul. 31, 1986 (abandoned).

In the claims:

Please cancel claims 30 and 33 without prejudice to pursuing the subject matter of these claims.

Please amend the claims as follows:

31. (Once Amended) A plant cell having integrated into its genome a DNA construct comprising as operably linked components in the direction of transcription, a promoter region obtainable from a gene, wherein said gene is light-inducible in a plant chloroplast containing tissue; a DNA sequence of interest other than the native coding sequence of said gene and native to a plant host; and a transcription termination region, wherein said components are functional in a plant cell; and wherein said DNA sequence of interest is in an antisense orientation.

32

32. (Once Amended) The plant cell according to claim 31, wherein said promoter region is an SSU promoter.
